

Bagmaster® Baggers

Bagmaster® 250 Bagger

Our **“NEW”** Bagmaster® 250 and 400 Vertical Form, Fill, and Seal Bagging Machines are designed for use in non-food as well as food applications. They can be integrated to our patented

Batchmaster® Counters, Weighers, and Kit Packaging Systems or with other OEM brand fillers.

Kit Packaging Systems

BSI provides complete engineered turnkey packaging solutions by combining our counters and weighers with a bagger and conveyor. Our kit packaging systems can produce standard or multi-cell kit bags. Up to 14 cell packs can be linked together with different print and product in each cell, or two different kits can be run at the same time. Offers refined interface and software data management, and real time data for quick and easy diagnostics to help maximize production.

Kit Line with Counters, Bagger, and Conveyor

Used & Refurbished

From time to time we have used BSI equipment available that we have taken in on trade or purchased. We refurbish this equipment back to factory specifications and resell it with a same as new one year warranty. This older equipment uses many of our existing patents that still provide unmatched speeds, accuracies, and capabilities over other brands that are offered today. Refurbished equipment is a low cost alternative to new and provides a high quality packaging solution.

Service Contracts

BSI is now working with customers to provide Preventive Maintenance Contracts tailored to our customer's individual needs. It is not uncommon for our equipment to run 3-shift production days for 20 years or more with minimal factory support and service. Not only does the equipment get run down, worn out, and poorly serviced, but operational knowledge, and correct service procedures are lost over the years. This results in reduced up time, reduced production, and increased ware, frustration, and emergency service cost. In order to run your equipment with maximum uptime and minimum service costs it is essential that a service and training plan is instated. BSI PM Contracts provide preferred scheduling in case an emergency visit is required, discounted labor rates and parts, and on-going training for operators and maintenance staff. Ask us to quote you a service contract, and stop worrying about tomorrow, today.

NEW Batchmaster® Counter

Dual Batchmaster® Counter

Our **Batchmaster®** Counter now includes bar code reading and Recipe Management. Large 10.4" color touch screen provides user friendly intuitive set-up, data monitoring, self-diagnostics, verified motion control technology, remote access, multi-language options, and custom password lock outs. The Counter analyzes product at 6,000 scans per second and can run at speeds of 100+ batches per minute. The compact design can be run by an operator in semi-automatic mode or can be integrated with a bagger, box or container handling equipment, blister, clamshell or magnetic orientation system.

Upgrades

The productivity of virtually any type of part counter or weigher can be increased by changing out the electronics package. Utilize your existing stand, hopper and feeder bowl and exchange your existing electronics package for a Batchmaster® electronics package. Increase speed and accuracy without increasing the footprint.

Pre-feed Systems

Bulk product pre-feeders provide easy ergonomic filling, gentle non-abrasive product handling, effective disentangling and uniform product flow.

NEW Batchmaster® Weigher

Our **Batchmaster®** Fast Automatic Weigher (FAW) now includes bar code reading and Recipe Management. Advanced programming and large 10.4" color touch screen provide user friendly intuitive set-up, data monitoring, self-diagnostics, verified motion control technology, remote access, multi-language options, and custom password lock outs. The FAW can weigh/count or weigh batches in pounds, ounces, kilograms, or grams. The compact design can be run by an operator in semi-automatic mode or can be integrated with a bagger, box or container handling equipment, blister, clamshell or magnetic orientation system.

Who We Are

Batching Systems, Inc. (BSI) has been engineering, manufacturing and integrating packaging lines for more than 25 years holding 7 patents for counting, batching, and feeding a wide range of products. Batching Systems, Inc. is a privately owned company that was founded in 1989. Located in Southern Maryland, the company occupies a 54,000 square foot modern facility on 10.6 acres.

Batching Systems is a one stop shop that provides complete system integration and engineering for kit packaging lines for the hardware, toy, RTA, and food industries; bag filling; box filling; carton filling; clamshell filling; and multi-cell kit packaging equipment

With over 50 years of experience in the electronic parts counting and packaging industry, our sales, service, and engineering departments are capable of designing and providing automated filling and packaging equipment for a wide variety of applications.
